Responsible Innovation™ - **SOLAR GOLD Lift Station Maintainer** harnesses the power of nature's resources to provide a bio-based blend that is uniquely suited for cleaning and deodorizing lift stations.

- NPE-Free.
- Non-caustic.
- Non-corrosive.
- Contains no petroleum distillates.
- Contains no chlorinated hydrocarbons.
- Deodorizes with a fresh citrus scent.

The excellent solvency of this product cuts grease and slime from the sidewalls of the station while the fresh citrus scent deodorizes even the most malodorous facilities.

DIRECTIONS:

Add sufficient material so that 1" (2.5 cm) or 2" (5.1 cm) of material floats on the surface of the water. This material will dissolve and solubilize grease accumulations in the lift station, as well as the grease accumulations on the side walls where it comes in contact.

Ask your United Representative for your suggested weekly maintenance dose. The recommended maintenance dose (1/4 of your initial dose per week) is strictly a suggested starting point. Conditions of use and load requirements may cause this to vary widely.

IMPORTANT

Be sure float is solvent resistant and is set, so the water level never goes to the point where the station is completely pumped out. Enough water should always remain in the station, to keep this maintainer intact. Submersed pumps and wiring must be solvent resistant. **United 633** will attack plastics, rubber, neoprene and soft materials. **DO NOT USE SOLAR GOLD LIFT STATION MAINTAINER IN A TURBULENT LIFT STATION.**

When using a metering pump with this product, you must use Viton® tubing.
